

SLC5A6 (SMVT) Protein-Protein Interaction Network — STRING v12

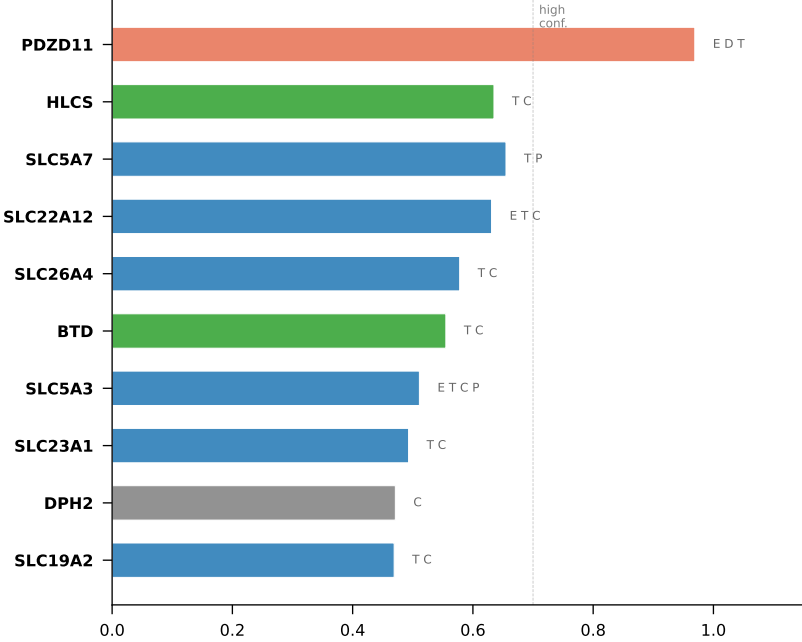

STRING PPI Network (score >= 0.4)

Strongest Interaction (score 0.969)

SLC5A6 Interaction Scores & Evidence

c Evidence Codes & Key Regulatory Circuit

- E Experimental (biochemical, Co-IP, etc.)
- D Database (curated pathway/PPI databases)
- T Text mining (co-mentioned in abstracts)
- C Co-expression (RNA correlation across tissues)
- P Phylogenetic co-occurrence

*HLCS feedback: HLCS biotinylates H4K12 at SLC5A6 promoter
--> silences SLC5A6 when biotin is abundant
--> loss of this loop may explain cancer overexpression*
